EXTERIORS DOOR

Exterior doors are a showcase of every house. They serve the purpose of ensuring security and isolating intimacy of your home from weather conditions. Specially reinforced structure and high quality wood means reliability for years to come.

We offer STILE and TWIN exterior doors. STILE doors are constructed of stiles, rails and a panel. TWIN doors are made of two identical flat plates.

All doors can come as double, with one, two, three fixed sidelights, open sidelights, with antaba (long metal bar) or handle.

INSIDE VIEW

THE DESIGN OF EXTERIOR FRAME-AND-PANEL DOOR 68 MM:

Exterior frame-and-panel door with a thickness of 68 mm is made of pine wood and laminated in layers or alternately, veneered with waterproof pine or oak plywood. The frame is filled with heat-insulating panel having a thickness of 32 mm.

Finishing:
Lacquering Five-layer coating system using hydrodynamic method with transparent paints in 14 colors or RAL palette colors.

Glazing:
Glazing unit with reflex glass, mirror venetian or frosted glass with possible use (optional) of various windows, including ornaments and stained glass. In doors, it is possible to replace the wooden panels with the glazing unit and vice versa.

Dimensions:
Exterior doors are available in custom sizes without additional charge for unusual dimension.

THE DESIGN OF EXTERIOR FRAME-AND-PANEL DOOR 78 MM:

Exterior frame-and-panel and plate door with a thickness of 78 mm is made of pine wood and laminated in layers and alternately, veneered with waterproof pine or oak plywood. The frame is filled with heat-insulating panel having a thickness of 42 mm (frame-and-panel) 60 mm (plate).

Finishing:
Lacquering Five-layer coating system using hydrodynamic method with transparent paints in 14 colors or RAL palette colors.

Glazing:
Glazing unit with reflex glass, mirror venetian or frosted glass with possible use (optional) of various windows, including ornaments and stained glass. In doors, it is possible to replace the wooden panels with the glazing unit and vice versa.

Dimensions:
Exterior doors are available in custom sizes without additional charge for unusual dimension.

FVE – ELECTRIC
FVS – SOLAR POWERED

Your smart home solution

DECK MOUNTED ELECTRIC OR SOLAR VENTING SKYLIGHT

Electric and solar powered deck mounted skylights are ideal solutions for out of reach applications, where besides the natural light, you would like to enjoy fresh air as well. FVE and FVS skylights are equipped with a radio communication system, allowing for easy remote operation without the need of pointing the remote towards the skylights. FVS skylights are powered by the integrated solar panel, so connection to a power source is not required.

Features:

- suitable for roof pitches between 15-85 degrees
- low-emission and heat-reflecting double glazed glass
- perimeter gasket underneath the frame
- easy "bracket-free" installation
- double seals between the frame and the sash
- internal gasket system to collect and drain any condensation water to the outside
- mosquito screen included
- integrated rain sensors
- remote control operated
- range of internal and external accessories
- integrated solar panel (FVS)

A breath of fresh air

DECK MOUNTED MANUAL VENTING SKYLIGHT

Manual venting skylights FV deliver light and fresh air and are recommended for installation where the skylights will be fairly easy to reach and operate with a control rod.

Features:

- suitable for roof pitches between 15-85 degrees
- low-emission and heat-reflecting double glazed glass
- perimeter gasket underneath the frame
- easy " bracket-free" installation
- double seals between the frame and the sash
- mosquito screen included
- operated with a crank or a control rod
- range of internal and external accessories available
- internal gasket system to collect and drain any condensation water to the outside

Light and simplicity

CURB MOUNTED FIXED SKYLIGHT

The newly developed curb mounted fixed skylight incorporates simple installation, long trouble-free use and the beauty of a modern design. Following world design trends of electronic devices, FAKRO has developed curb mounted skylighth with completely (smartphone like) flat surface, allowing installation on any type of roofs in any direction you wish.

Features:

- suitable for roof pitches between 0-60 degrees
- unique modern design
- low-emission and heat-reflecting double glazed glass
- white PVC frame allows installation of internal blinds
- frame made from mutiple chamber PVC profile
- range of internal and external accessories
- 360° turn-around installation

The innovative curb mounted skylight FXC allows you to match the colour of the skylight finish with the existing roof design. A wide range of colors in accordance with the RAL Classic Palette.

Flange-free glass installation to provide free water flow off the glass.

DRF
Flat roof access skylight.

DRC
Flat roof access skylight with a dome.

DRL
- mounted on the roof surface
- the whole structure is insulated

LML
- can be installed in the opening under the DRL roof access door
- gas piston supports unfolding and folding the ladder
- additional upper tread for safe step-up
- wide 5" (13cm) anti-slip treads

FLAT ROOF ACCESS SKYLIGHT

DRF

The insulated roof access skylight DRF are new products, expanding the range of FAKRO solutions for flat roofs. In addition to serving as a skylight, they have an extra utility feature providing safe and convenient access to the flat roof. Special hinges and a functional opening system used in the access roof light ensure easy sash opening up to 80°. Gas springs the operation of the sash and keep it stable in the open position, thus protecting against accidental closing. What is more, roof access skylights feature increased safety of use thanks to the application of anti-slip covers on their profiles.

FLAT ROOF ACCESS SKYLIGHT DRF DIMENSIONS						
Size						
		35/35	35/47	39/39	47/47	
		90x90 (cm)	90x120 (cm)	100x100 (cm)	120x120 (cm)

		1120x1120	1120x1420	1220x1220	1420x1420	
Daylight area (glass)	sq. ft. m²	6.5	8.94	8.29	12.5	
		0.6	0.83	0.77	1.16	

Features:

- the frame of the flat roof skylight is
- constructed of multi-chamber PVC
- profiles filled with insulation material.
- In the DRF roof access skylight, the
- upper part of the window comes with
- an innovative flat glazing unit
- the DRF roof access skylight is an
- energy-efficient, DU6 glazing unit with
- a Class P4A anti-burglary inner pane
- (EN 12567-2) and a whole window
- U-value of 0.74 W/m2K (EN 14351-
- 1:2006+A1:2010). R-value = 7.7
- windows can be also mounted on an
- additional XRD base with a height of
- 5 7/8" (15cm), for installation in green or
- living roofs
- DRF access roof skylight is designed for
- pitches between 2° and 15°
- the structure of the access roof skylight
- enables installation of internal as well
- as external accessories. Use of an
- external awning blind protects the
- room from overheating, while internal
- accessories provide protection from
- intense sunlight and enhance interior design

FLAT ROOF ACCESS DOOR

DRL

The DRL roof access door is an innovative product providing safe and comfortable access to the flat roof. Its structural durability and range of sizes provide the perfect combination with an attic ladder.

FLAT ROOF ACCESS DOOR DRL DIMENSIONS						
Size						
	24/47 60x120	28/47 70x120	28/51 70x130	28/55 70x140	34/51 86x130	36/51 92x130
DRL	+	+	+	+	+	+
Room height in inches (cm)	9' 2 3/4" 280					
Attic ladder size in inches (cm)	24/47 60x120	28/47 70x120	28/51 70x130	28/55 70x140	34/51 86x130	36/51 92x130
LML	+	+	+	+	+	+

Features:

- fully assembled product
- the frame is constructed of multi-chamber PVC
- profiles filled with insulation material
- insulated sash equipped with a rubber seal ensures
- perfect thermal insulation performance
- opens up to 60°. Gas springs facilitate opening and
- closing, and the sash can be left open
- anti-slip tape on the base ensures safe access to the
- flat roof
- sizes of the roof access door are adjusted
- according to the size of attic ladders (attic ladders
- sold separately). DRL access doors come only in
- European (metric) sizes, and can be installed only
- with LML ladders, also in metric sizes
- can be mounted on an additional XRD base with
- a height of 6" (15 cm) for installation in green and
- living roofs
- option to install an additional ZBR lock which
- protects against accidental closure of the sash
- suitable for roof pitches between 0° and 5°

Perfection in every detail

Perfectherm stands for modern windows made to the highest standards.

Perfectherm windows will provide your interior with a unique character because we have taken care of every detail in creating them. The cores of the window profiles, available in four different colours (white, brown, dark grey and caramel), when open, they perfectly match the applied veneer and suit modern interiors. Thanks to the low rabbet, the window gains a larger area of the glass, and the room gets more light. The optimally selected number of chambers, the use of an additional middle gasket in the frame and sash, as well as a triple glazing system make Perfectherm windows meet the requirements of passivejoinery.

■ STYLISH

Two shapes of sash- design and classic, perfectly fit into modern constructions.

Perfectherm windows give the buildings light and an unusual style.

■ HARMONIOUS

The four colours of the profiles' core form a harmonious connection with a wide range of veneers. Perfectherm windows look great in both classic white and wood-like decorative films and modernist colours from the RAL palette.

■ WARM

Six-chamber sash profiles with a depth of 80 mm and 48 mm threepane glazing with a warm frame provide excellent thermal insulation of the window at the level of 0.18 W/m²K.

THERMALL
U_w
0,78
W/m²K*
insulation

■ TIGHT

The use of three gaskets in the sash and in the frame makes it possible to obtain very good insulation parameters.

■ SAFE

Carefully designed, durable construction, the use of antitheft catches and systems with safety glass, effectively protect the building against burglary.

■ RELIABLE

Window profiles in the A class thickness, locking fittings in the 5th highest class of corrosion resistance and large, specially profiled reinforcements guarantee reliability for many years.

*U_w coefficient for the reference window, confirmed by a test certificate.

Optitherm windows are more like standard. It is an offer for people looking for woodwork with higher parameters of thermal insulation and optimal price. 80 mm 6-chamber profiles with wide external deaeration chamber is a guarantee of durability and resistance to unfavourable atmospheric conditions, especially to high temperatures causing stresses.

■ OPTITHERM

Provides ecological profiles, where the leaden regulators were replaced with the calcium-zinc stabilizer, that are human and environmental friendly.

■ OPTITHERM

is a guarantee of durability and long term faultless exploitation, thanks to the reinforcement closed inside the frame and high quality multi point locking fittings with EPDM.

■ OPTITHERM

Provides balanced harmony of rounding casement and frames, stylish glazing bead, black or gray seals, wide variety of windows panels as well as warm edges.

■ OPTITHERM

means higher energy saving. 6-chamber profiles as well as 80 mm frames and application of triple glazing packets ensure excellent thermal insulation.

■ OPTITHERM

means calmness and safety. Wide choice of glazing units with higher acoustic insulation and burglary resistance parameters, possibility of mushroom striker, plate installation as well as handle with metal insert, that increases users comfort and safety.

The CLASICTHERM windows are a guarantee of a standard on the highest level. The 6-chamber system of 70 mm is offered with a classic, straight un-faced wing and a mildly rounded half-faced wing. The high quality of PCV mixture used in production of compressed profiles in SONAROL company guarantees a long-term persistence of colour, resistance to atmospheric factors and ease of conservation.

■ LEAD-FREE

Ecological CLASICTHERM profiles produced on calcium-zinc stabilizers are lead-free.

■ ELEGANT

Symmetrical and mildly rounded profiles, stylish glazing bead with a black or gray gasket packet with a warm frame in various colours cause the windows gain inimitable appearance.

■ PERMANENT AND SAFE

Closed reinforcement in the frame, possibility of applying the handle Secustik and anti-burglary ferrules guarantee a long-term non-failure usage and protect from the house-breaking.

■ WARM

6-chamber 70 mm frame and wind profiles and a possibility of triple glaze packet application (each 40 mm wide) with a warm edge ensure a perfect thermal insulation.

■ DREAMED-OF

A wide choice of veneer colours, a possibility of varnishing in any colour from the RAL palette and an arbitrary shape cause the CLASICTHERM windows to be adjusted to even the most sophisticated project.

■ QUIET

6-chamber profile system and application of triple glazing or sound-absorbing packets guarantees tranquillity in privacy.
